McDonald's USA Ingredients Listing for Popular Menu Items

Provided below is a listing of components in our popular menu items by category, followed by the ingredient statements for those components. Allergens contained within these components are indicated in capital type at the end of each respective ingredient statement. We encourage customers to check these statements regularly as ingredients in menu items may change.

At McDonald's, we take great care to serve quality, great-tasting menu items to our customers each and every time they visit our restaurants. We understand that each of our customers has individual needs and considerations when choosing a place to eat or drink outside their home, especially those customers with food allergies. As part of our commitment to you, we provide the most current ingredient information available from our food suppliers for the eight most common allergens as identified by the U.S. Food and Drug Administration (eggs, dairy, wheat, soy, peanuts, tree nuts, fish and shellfish), so that our guests with food allergies can make informed food selections. However, we also want you to know that despite taking precautions, normal kitchen operations may involve some shared cooking and preparation areas, equipment and utensils, and the possibility exists for your food items to come in contact with other food products, including other allergens. We encourage our customers with food allergies or special dietary needs to visit www.mcdonalds.com for ingredient information, and to consult their doctor for questions regarding their diet. Due to the individualized nature of food allergies and food sensitivities, customer's physicians may be best positioned to make recommendations for customers with food allergies and special dietary needs. If you have questions about our food, please reach out to us directly at mcdonalds.com/contact or 1-800-244-6227. Thank you.

The nutrition information on this website is derived from testing conducted in accredited laboratories, published resources, or from information provided from McDonald's suppliers. The nutrition information is based on standard product formulations and serving sizes (including ice for beverages). All nutrition information is based on average values for ingredients from McDonald's suppliers throughout the U.S. and is rounded to meet current US FDA NLEA guidelines. Variation in serving sizes, preparation techniques, product testing and sources of supply, as well as regional and seasonal differences may affect the nutrition values for each product. In addition, product formulations change periodically. You should expect some variation in the nutrient content of the products purchased in our restaurants. McDonalds USA does not certify or claim any of its US menu items as Halal, Kosher or meeting any other religious requirements. We do not promote any of our US menu items as vegetarian, vegan or gluten-free. This information is correct as of May 2014, unless stated otherwise.
